Erratum

Erratum to: “On δ -normality”, Topology and its Applications
56 (1994) 117–127[☆]C. Good^{a,*}, I.J. Tree^b^a *School of Maths and Stats, The University of Birmingham, Edgbaston, Birmingham B15 2TT, UK*^b *Department of Mathematics, University of North Texas, Denton, TX 76203, USA*

On the last page of our paper “On δ -normality”, the first author claims that it “is easy to see that, if $X \times [0, 1]$ is subnormal, then X is countably metacompact”. There was an error in the (unpublished) proof of this statement, which therefore remains unresolved, though we no longer believe it to be true. The error does not affect any other result in the paper. We should like to apologise for the mistake and thank those who have brought it to our attention.
